A Given Imaging Company

Given Imaging is pleased to offer

The Practical & Technical Nursing Aspects of High Resolution Manometry (HRM) Workshop

**Please join us at the CT SGNA
Beyond the Scope Program**

**Friday, November 4, 2011
5:30 – 7:30 pm**

**Hilton Mystic
20 Coogan Boulevard
Mystic, Connecticut 06355**

Learning Objectives:

The purpose of this program is to build a solid knowledge foundation to perform accurate manometry procedures and establish an effective GI Motility Lab. This program is also designed to provide attendees with a basic understanding of normal and abnormal esophageal motility, the proper set up, use and analysis of the ManoScan™ manometry systems. Participants will gain experience in best practices for patient and procedure management through the review of cases and hands-on demonstration of the equipment.

This continuing nursing education activity was approved for 1.5 continuing education contact hours by the Georgia Nurses Association

Please RSVP by Friday, Oct. 7 to:
